POWER CELL

Designed for Maximum Performance in Traxxas Transmitters and Vehicles

Traxxas Power Cell Alkaline Batteries deliver long life in all R/C applications, household devices, game controllers, and other personal electronics. Power Cell Alkaline Batteries are Traxxas Certified to meet power requirements of Traxxas transmitters and electronics.

Traxxas Power Cell Alkaline Batteries contain no mercury, lead, or cadmium and are safe for disposal with household waste.

Caution: Traxxas Power Cell Alkaline Batteries are NOT rechargeable. Do not recharge, dispose of in fire, mix with other battery types, install backwards, or disassemble alkaline batteries. Never carry loose batteries in your pocket, purse, or other container. Do not remove or modify the battery label. Responsibly discard dented or damaged batteries. When replacing depleted batteries, replace all the batteries in the device at the same time. Failure to observe these precautions may cause leakage, explosion, and personal injury.

By purchasing this product, the user agrees to accept responsibility for all such risks, and will not hold Traxxas, its affiliates, manufacturers, distributors, or sellers responsible for any accident, injuries to persons, or damage to property resulting from the use of this product. This product contains chemicals known to the State of California to contain to cause cancer, birth defects, and other reproductive harm.
