

### Extended Battery Hold-Down Instructions

Covers Parts #3927X

The number on each side of the hold down indicates the battery height in millimeters that hold-down can accommodate. Note that one side is labeled "28" and other side is labeled "21". The 28mm side is for use with large battery packs. If you are using very small packs, simply flip the hold-down over to the 21mm side and use it on the opposite side of the chassis.

There are four foam blocks included in this kit. When using the 28mm side, the thin foam block should be installed in the rear of the battery compartment to help provide space for installing the battery hold-down. The larger foam block should be installed in the front of the battery compartment as necessary.

If you have questions or need technical assistance, call Traxxas at **1-888-TRAXXAS** (1-888-872-9927) (U.S. residents only)
